

# GM200-I27-I0-I5

## THERMOELECTRIC GENERATOR MODULE

### Features

- Generates power when a temperature difference is applied
- Compact structure (no moving parts)
- Reliable performance
- Maintenance-free
- Noise-free operation
- Low-carbon, green technology

CHARACTERISTICS		
Parameters correct at temp.	[°C]	Hot side: 200 Cold side: 30
Matched load output power	[W]	2.72
Matched load resistance	[Ω]	6.3 ± 15%
Open circuit voltage	[V]	8.28
Matched load output	[A]	0.66
Matched load output voltage	[V]	4.14
Heat flow through module	[W]	~54.4
Maximum compress (non-destructive)	[MPa]	I
Maximum operation temperature	[°C]	Hot side: 200 Cold side: 175

# GM200-I27-I0-15
